 Malmö, Sweden

I am writing to express my strong interest in the **Senior Database Developer** position within IKEA of Sweden. Having worked extensively with IKEA systems over 9 years (beginning of my career), I have been deeply inspired by IKEA's values of simplicity, togetherness, and innovation. These values have guided my professional growth and continue to motivate my desire to contribute to IKEA's mission.

In my previous role as **AMS Lead for IKEA PRM & PC platforms**, I managed end-to-end application support and database operations, administration, design & development ensuring stability and performance across critical systems. I believe I have strong knowledge in PINFO and family databases and their integrations. My experience includes **incident and problem management, performance tuning, end-to.end ownership and integration flows**, all of which align closely with the responsibilities of this role.

I bring strong technical expertise in **Oracle, PostgreSQL, C#, and Azure cloud solutions**, combined with a proven ability to collaborate with global teams.

I am believe that my background, combined with my passion for IKEA's values and my willingness to travel and collaborate internationally, makes me a strong fit for this position. I would welcome the opportunity to discuss how my experience can contribute to the success of the PRM Platform team.

Thank you for considering my application. I look forward to the possibility of an interview.

Warm regards,

Appala Naidu Kolli
