Job Description

Job ID: REF17599J

Date posted: 07/08/2025

Passionate about data and technology? IKEA offers a workplace where your skills can flourish while you work at the forefront of technology. Join a team where innovation and collaboration go hand in hand, and where you will be empowered to drive change and inspire new thinking. Work with the latest technologies in cross-functional teams and contribute to a better everyday life at home for people worldwide.

Come and challenge old truths and grow with us – your new journey starts here!

Are you a highly motivated professional with an entrepreneurial spirit and a passion for data and technology? Would you like to be at the forefront of the digital revolution, helping to shape the future of our new Technology Architecture? If yes, then IKEA has an amazing opportunity for you!

high growth projects. Your work will focus on designing cost-efficient, secure, and reliable digital products that place data and business at the center.

Key Responsibilities:

- **Vision Alignment:** Understand the vision of digital product leaders, covering the overall application portfolio and business priorities. Design robust architectures and solutions, including third-party solutions, that match this vision.
- **Modernization Roadmap:** Apply your technical knowledge and business insights to guide through their modernization roadmap.
- **Solution Design:** Architect solutions to meet business needs, ensuring the technical feasibility of new projects and successful deployments.
- **Collaboration:** Work closely with other Solution Architects and stakeholders to ensure all solutions adhere to the Technology Architecture, exhibiting high levels of performance, security, scalability, maintainability, reusability, and reliability upon deployment.
- **Architectural Design Sessions:** Lead sessions to build an implementation plan aligned with business goals and technical environment, resulting in consensus on solution design and the next steps toward production.
- **Continuous Learning:** Maintain and share technical skills and knowledge of market trends and competitive insights within the technical community.

Qualification

- **Education:** Bachelor's or Master's Degree in Computer Science, Information Technology, Engineering, Business, or a related field OR equivalent experience.
- **Experience:**
  - 5+ years of experience in cloud/infrastructure technologies, IT consulting/support, systems administration, network operations, software development/support, technology solutions, practice development, architecture, and/or consulting.
  - 3+ years of experience in leading technical projects.

Preferred Qualifications:

- 2+ years of experience working with Digital Native companies, demonstrating a strong understanding of their unique technological and business needs.
- Technical Certification in Cloud (e.g., Azure, Amazon Web Services, Google) or equivalent.
- Experience in critical domains such as Part Structure Management, PLM, CAD, Material & BOM Management, Coexistence, Product Labeling, Product Packaging, Compliance & Verification, Product Quality & Sustainability, GS1, Digital Product Passport (DPP), PTC.

This role offers a dynamic environment conducive to continuous learning, allowing you to deepen your technical expertise and expand your understanding across various technologies. The pace is fast, the work is stimulating, and collaboration is significant for this role.

More Information
This is a full-time position located in Malmö. We are conducting ongoing interviews, so we encourage you to submit your application without hesitation.
